

Safety Programs and Policies

1. Weekly safety meetings are held on all jobsites to address all current and/or potential safety concerns. Attendance is mandatory for employees as well as subcontractors.
2. H. Watt & Scott, Inc. has a Forklift Safety Training Program and an Aerial Platform Safety Training Program for all employees who will be operating such equipment.
3. All employees are required to wear the necessary safety gear while on the jobsite including hard hats, steel toed boots, and eye protection. Also, ear protection and particle masks/respirators are required when necessary.
4. First aid kits are maintained on all jobsites along with clearly posted emergency numbers.
5. Each jobsite has a Project Safety Binder with an Emergency Action Plan, Physical Agent Data Sheets, and a map with the location and directions to the nearest emergency care facility.
6. All MSDS sheets are kept in a master file at our main office and are readily available via fax or email upon request. Job specific MSDS sheets are also kept on file on the jobsite.
